Title: cookie policy

Code: n/a
Page 1 of 2

1. GENERAL PROVISIONS

1.1. PURPOSE OF THIS POLICY

1.1.1. This Policy explains which cookies and other browser storage technologies may be used when visiting the VEYR CORP website (<https://veyer-corp.veyer.workers.dev>), using the catalog, placing an order, and using a user account.

1.1.2. This Policy supplements the Privacy Policy and applies to technologies that store information in the user's browser or support the operation of certain website features. If such a technology involves the processing of Personal Data, that processing is also governed by the Privacy Policy.

1.1.3. Contact for inquiries: sumrakarvin@gmail.com.

1.1.4. VEYR CORP is the name of the website and creative project and does not denote a separate legal entity.

1.2. TERMS AND TECHNOLOGIES

A **cookie** is a small piece of data that the website or a service used by it may store in the browser and retrieve on subsequent requests. Cookies may be session cookies, which remain active until the end of a session, or persistent cookies, which are stored for a period determined by their purpose.

LocalStorage and **sessionStorage** are built-in browser storage mechanisms. LocalStorage may retain information between visits until it is deleted or replaced, while sessionStorage is generally used within the current tab or session. These technologies are not cookies, but are described together with them in this Policy.

1.3. USE OF COOKIES AND BROWSER STORAGE

1.3.1. Strictly necessary cookies, session identifiers, and other technical information may be used to sign in to a user account and maintain an authenticated session. They are required to verify authorization, protect access, prevent abuse, and ensure the proper operation of restricted website features.

1.3.2. Local and session storage may be used for interface settings and the state of individual features, including language selection, menu state, catalog activity, the cart, or a checkout draft where the relevant feature is implemented in the browser. Deleting this data may reset saved settings or require the user to sign in again.

2. THIRD-PARTY TECHNOLOGIES

2.1.1. The website's technical infrastructure is provided using Cloudflare services. When the website is accessed, this infrastructure may process technical information and use mechanisms necessary for content delivery,

security, request validation, and protection against abuse. The processing of Personal Data by infrastructure providers is further described in the Privacy Policy.

2.1.2. When choosing to sign in through a third-party service, the user is redirected to that provider's authentication process. Such a service may use its own cookies and other technologies under its own rules. The same applies to external websites reached through links and to an external payment service where a separate stage of checkout is performed on that service's page.

3. OPTIONAL TECHNOLOGIES

3.1.1. Use of the website, registration, and sign-in do not by themselves constitute consent to optional analytics, advertising, or marketing tracking. If the website uses technologies for which applicable law requires prior consent, they will be used only after such consent has been obtained.

3.1.2. Where a separate consent control is provided for an optional technology, the user may change their choice using the available method. Withdrawal of consent does not affect the lawfulness of processing carried out before withdrawal and does not prevent the use of strictly necessary technologies where an independent lawful basis exists.

4. MANAGEMENT AND DELETION

4.1.1. The user may delete or block cookies and localStorage/sessionStorage data through browser settings. The names of settings sections and available actions depend on the browser and device. Blocking strictly necessary technologies may prevent sign-in, cart storage, checkout, or the operation of certain website features.

4.1.2. Session data is stored for the relevant session or another technically necessary period. Persistent cookies and browser storage data are retained no longer than required for their purpose, or until they are deleted, replaced, or reset by the user. Deleting browser data does not automatically delete information that is lawfully stored on the website's server.

5. PERSONAL DATA

5.1.1. If a cookie, session identifier, IP address, or browser storage information allows information to be linked directly or indirectly to a particular user, its processing is carried out in accordance with applicable personal data law and the VEYR CORP Privacy Policy.

5.1.2. The user's rights regarding Personal Data, the procedure for submitting requests, processing purposes, service providers, and retention information are described in the Privacy Policy in the "Agreements" section. Questions concerning cookies and browser storage may also be sent to sumrakarvin@gmail.com.

6. NEW VERSIONS

The current approved version is published in the "Agreements" section with its date and version number. Material changes to the technologies used or the purposes for which they are used are reflected in a new version before they take effect; separate consent is requested where required by applicable law.

1. GENERAL PROVISIONS

1.1. SCOPE

This Policy explains what information is processed when visiting the VEYR CORP website (<https://veyer-corp.veyer.workers.dev>), using the user account and catalog, or contacting support. It applies to website visitors and users of its services.

1.2. DEFINITIONS

Personal Data – any information relating to a directly or indirectly identified or identifiable natural person.

Processing – any operation performed on Personal Data, including collection, recording, storage, modification, access, use, and deletion.

VEYR CORP is the name of the website and creative project and does not denote a separate legal entity.

1.3. GDPR COMPLIANCE

1.3.1. Where Regulation (EU) 2016/679 (GDPR) applies to the processing of Personal Data, such processing is carried out in accordance with the applicable requirements of the GDPR.

1.3.2. For GDPR purposes, the controller is the owner of the VEYR CORP project, P.S. Dvoynikov; contact for data processing matters: sumrakarvin@gmail.com.

1.3.3. Where provided for by the GDPR, the user has the following rights:

1. Right to information: You have the right to receive information about what Personal Data is processed, for what purposes, on what legal basis, and to whom it is disclosed.
2. Right of access: You may request access to your Personal Data that is being processed.
3. Right to rectification: You may request correction of inaccurate Personal Data or completion of incomplete Personal Data.
4. Right to erasure ("right to be forgotten"): You may request deletion of Personal Data in the circumstances provided for by the GDPR.
5. Right to restriction of processing: You may request restriction of the processing of Personal Data in the circumstances provided for by the GDPR.

Title:	privacy policy	Page	2 of 4

6. Right to data portability: Where provided for by the GDPR, you may receive the data you have provided in a structured, commonly used, machine-readable format and, where applicable, transmit it to another controller.
7. Right to object: You may object to the processing of Personal Data in the circumstances provided for by the GDPR.

1.3.4. Use of the website by itself does not constitute consent to the processing of Personal Data where such consent is required.

2. INFORMATION COLLECTED

2.1. SIGN-IN AND ACCOUNT INFORMATION

2.1.1. Registration and sign-in use an email address, information about its verification, and an account identifier. Where password sign-in is used, a protected representation of the password is stored rather than the password in plain text. Where sign-in by code is used, the one-time code and information necessary to verify its validity are processed. Verification codes must not be shared with other persons.

2.1.2. The account processes information that the user enters or saves: profile information, addresses and recipients, favorite items, library content, support requests, and related records. Optional fields do not need to be completed merely to browse public pages.

2.2. CATALOG AND CHECKOUT

When using the cart, the selected items and a checkout draft may be stored. Physical delivery may require recipient information, an address, and contact details. Information about another recipient should be provided only where there is a lawful basis and with that person's knowledge.

2.3. SIGN-IN THROUGH THIRD-PARTY SERVICES

When an available external sign-in method is used, the website receives from the selected service a user identifier and profile information made available by that service, such as name, email address, verification status, and profile image. The information received depends on the provider and the permissions shown to the user during sign-in.

2.4. TECHNICAL DATA AND BROWSER STORAGE

2.4.1. When the website is accessed, the technical infrastructure may process the IP address, browser and device information, request time and parameters, and error and security logs. Service cookies and session information are used for authenticated access.

2.4.2. Local and session browser storage is used for interface settings and the state of individual features, including language selection, menu state, and catalog activity. Deleting this data in browser settings may reset settings or require the user to sign in again. Registration alone does not enable advertising communications or optional tracking.

3. PURPOSES OF PROCESSING

3.1.1. Data is used to provide and protect access to the user account, save selected materials and user settings, restore access, handle requests, and perform actions requested by the user. Technical information is used to operate the website, prevent abuse, and investigate errors.

3.1.2. For each purpose, the appropriate legal basis is used: taking steps at the user's request before entering into a contract or performance of a contract, compliance with a legal obligation, or the user's consent where required. Data is not used for a new incompatible purpose without a separate legal basis.

4. SERVICE PROVIDERS AND EXTERNAL LINKS

4.1.1. In the current technical configuration, the website and server-side data are serviced through Cloudflare infrastructure, while service emails are sent through Gmail. When an email is sent, the email service receives the recipient's address and the message content. A connected external sign-in provider processes authentication under its own rules.

4.1.2. Following a link to a third-party website, such as YouTube or Pinterest, opens a resource to which this Policy does not apply. Service providers are engaged and Personal Data is transferred to them in accordance with applicable requirements, including requirements concerning data location and cross-border transfers.

5. RETENTION AND DELETION

5.1.1. Information is retained no longer than necessary for the stated purpose unless a longer period is required by law or is necessary to resolve a legitimate dispute. One-time codes have a limited validity period; session information is needed to maintain and protect authentication.

5.1.2. Account data after account closure, support requests, security logs, and backups are retained for one month. When the legal basis for processing ends, data is deleted or anonymized unless another lawful basis requires its retention. Deletion takes into account operational databases and the lifecycle of backups.

6. USER REQUESTS

6.1.1. Questions about the processing of Personal Data may be sent to sumrakarvin@gmail.com. In the request, please state the account email address, the substance of the request, and a method of contact. Do not send passwords, one-time codes, or copies of documents unless they have been specifically and reasonably requested.

6.1.2. You may request information about the processing of your Personal Data, correction of inaccuracies, cessation of processing, or deletion of Personal Data where there are grounds provided by law. If processing is based on consent, that consent may be withdrawn. Withdrawal does not invalidate processing for which an independent lawful basis exists. Before acting on a request, it may be necessary to verify that it was submitted by the data subject concerned.

6.1.3. Requests are handled within the periods established by applicable law. If a request is restricted by law or affects the rights of other persons, the user will be informed of the grounds for the restriction. The user may complain to the competent personal data protection authority or apply to a court. Where the GDPR applies to the processing, the user may also lodge a complaint with the competent data protection supervisory authority.

7. INFORMATION SECURITY

7.1.1. HTTPS is used to access the website.

Type:	appendix	Code:	n/a
Title:	privacy policy	Page	4 of 4

7.1.2. Access to restricted sections is verified on the server, and operations that modify data are limited by the user's permissions.

7.1.3. Organizational and technical measures necessary to prevent unauthorized access, modification, disclosure, or destruction of Personal Data are applied; access by service personnel is limited according to their authority, and incident-response procedures are kept up to date.

7.1.4. No technical measure eliminates all risks; users should also protect the email accounts and devices they use to access their accounts.

8 CHANGES TO THIS POLICY AND CONTACT

8.1.1. The current approved version is published in the VEYR CORP "Agreements" section with its date and version number. If the purposes or conditions of processing change materially, users are informed before the new conditions take effect; where new consent is required, it is requested separately.

8.1.2. Contact for privacy and Personal Data matters: sumrakarvin@gmail.com.
